Interactive Touch Screens

Maximise drink sales & improve efficiency

"The immediate results were better than we even anticipated. Our drink sales went up by 23% and wine sales by 40% comparatively to last year's figures and the staff efficiency improved significantly. Mistakes reduced and that simply translated as a major profit increase."

Luke Seanson, Via Italia Mooloolaba

What is Ai-Drinks?

The Ai-Drinks product is a new tablet-based drinks ordering system, produced by Ai-Menu Systems that is customised to feature your menu items and options.

Instead of traditional paper drinks menus, this system revolutionizes the industry by providing tablets with Ai-Drinks software, all linking to the central restaurant screen.

Counter space in a restaurant is very valuable, and our specially-selected small 12-inch touch-screen monitor fits perfectly next to your main POS screen.

Central PC server provides clear information on each table's orders. All drink sales are shown so everything is accounted for.

How Ai-Drinks works?

Customers arrive and are greeted, ushered to a table and provided with Ai-Drinks tablet menus featuring your logo

From the Ai-Drinks tablet they browse your personalised drinks menu and order via the touch screen tablet

Any time an order is placed it is printed directly to the bar to be prepared and served within seconds

At any stage, customers can call a waiter to their table with the special "Call Waiter" button

FROM \$1 A DAY per tablet with NO upfront costs*

Benefits of Ai-Drinks System

- Improve drinks sales
 - easy to order from a tablet (no need to wait for a waiter)
 - enticing photos promote sales (optional extra)
 - decreased waiting time = more drinks ordered
- Reduce errors
 - no more “forgot to charge” or “got distracted”
 - all drinks will be accounted for
- Improve productivity of bar and wait staff
- Improve customer satisfaction
 - remove a sold-out drink with ease during service
 - drink information readily accessible
 - Call Waiter option provides for great communication
- Valuable customer feedback can be collected via the tablet’s integrated reviews page. Customer contact details can be exported to create an email mailout list.
- History of orders is saved internally and can be viewed to analyse trends and make improvements

Collect feedback & build your customer database

Customer feedback can be collected via the tablet’s integrated reviews page and data exported to create an email mailout list

Frequently Asked Questions

Who are Ai-Menu Systems and where are we based?

We are based in Australia and are at the forefront of wireless, electronic menus. We specialise in interactive touch screen food and drink menus which automate the restaurant ordering process, improve sales and reduce waiter mistakes.

What is included in the Ai-Drinks System?

- Windows Computer with 12-inch Touch-Screen Monitor
- Wireless Router
- Thermal Printer
- Tablets with Leatherette Cases and Custom Logos
- Tablet Charging Stations

Optional Additions: Uninterruptible Power Supply, Wireless Lamp, Extra Thermal Printer, Drink Photography

What is the fee structure for Ai-Drinks?

There are no upfront fees and system cost is based purely on number of tablets: \$1 per tablet per day, over a 2 year contract

*terms & conditions apply – see the Ai-Menu representative for details

“We installed the full Ai-Menu system in February and had an immediate upturn in sales and staff productivity. The system enables us to offer full table service without employing additional staff. Our average weekly sales increased by 10/15% while wages actually reduced. Our customers and staff took to the system quickly. We highly recommend the system to improve sales and customer experience. I think this product is the future of menus.”

Scott Leslie – Director, Brat Haus Valley
